April 2020 – March 2021 Supplier Fuel Mix Disclosure for Great Britain

Dear Customer,

The Electricity (Fuel Mix Disclosure) Regulations 2005 (SI 2005 No. 391) introduced a requirement on all electricity suppliers in Great Britain to disclose to their customers the mix of fuels used to generate the electricity supplied annually, provided that electricity is supplied for a full disclosure period (01 April – 31 March). The mix of fuels are expressed as percentages of all electricity supplied.

To meet this obligation, please find below the 01 April 2020 to 31 March 2021 Fuel Mix Disclosure for Shell Energy Supply UK Limited on behalf of Shell Energy Europe Limited.

Energy Source	Our fuel mix (%)	Carbon Dioxide Emissions (g/KWh)	UK fuel mix for comparison (%)
Coal	0	-	2.7
Natural Gas	0	-	38.2
Nuclear	0	-	16.1
Renewables	100	0	40.3
Other	0	-	2.7

Our renewable energy is backed by UK-certified renewable certificates of origin, which means that all of the electricity you buy from us is matched with the equivalent amount of units from 100% renewable sources.
