

**REPORT ON PAYMENTS
TO GOVERNMENTS FOR
THE YEAR 2015**

Basis of Preparation

BG Group ("BG") has prepared this report in line with the requirements of the UK statutory instrument: Reports on Payments to Governments Regulations 2014 ("the Regulations").

Exploration and Production (E&P) activities within BG

The E&P activity within BG operates predominantly via a joint venture structure in which BG is operator, non-operator or a joint operator.

In joint venture arrangements where BG is the operator, 100% of payments made directly to the host government have been disclosed in the report

Where BG is non-operator, any payments made directly to the operator and not the host government, have not been included in the report.

In some countries, taxes payable by BG are settled by the national oil company. These amounts have been reported as if BG had made the payment directly.

Reporting by Government

The Regulations define a government as *"any national, regional or local authority of a country, and includes a department, agency or undertaking that is a subsidiary undertaking where the authority is the parent undertaking."*

Reporting by Project

In accordance with the Regulations, BG is required to disclose payment types by project where a project is defined as *"the operational activities which are governed by a single contract, licence, lease, concession or similar legal agreement, and form the basis for payment liabilities with a government."*

Where there are multiple agreements that are substantially interconnected, either operationally or geographically, these are deemed to constitute a single project and have been reported as such.

Where it has not been possible to distinguish payments made solely in relation to extractive activities from those that are outside the regulatory scope, the entire amount has been reported.

Materiality of reported payments

BG has complied with the Regulations which require that a payment of greater than the USD equivalent of £86,000 be reported whether it is a single payment or forms part of a series of related payments within the financial year. The same materiality threshold is applied to payments in kind that are attributed a monetary value.

The USD value of payments is converted from local currency using monthly rates used for financial reporting purposes, except in locations where specific rates are used for local tax reporting.

Categories of Payments

In accordance with the Regulations, BG has disclosed payments made to government on a cash basis, under the following categories. All amounts are denoted in USD which is the Group reporting currency:

- (i) Production Entitlements relate to the host government's share of the hydrocarbons extracted. Payments may be made in cash or in kind. Where production entitlements are paid in kind, the value of the entitlement is based on prevailing market prices during the reporting period. Production entitlements will only be included where BG is the operator as it is the operator who generally makes the payment to the government or calculates the government's share of production;
- (ii) Taxes are those that are levied on the income, production or profits of companies but exclude taxes levied on consumption such as value added taxes, personal income taxes or sales taxes. Any tax refunds will also be reported, whether via netting off a tax liability or as an individual receipt. Explanatory notes are provided for each scenario;
- (iii) Royalties are amounts paid for the on-going extraction of hydrocarbons, or access to the land where the hydrocarbons are located. Typically royalties are paid in cash although where amounts are paid in kind barrels of oil equivalent (boe), BG will also report the value of the royalty based on prevailing market prices during the reporting period;
- (iv) Dividends, other than dividends paid to a government as an ordinary shareholder unless they are paid in lieu of a production entitlement or royalty. BG has not identified any payments in this category in the year;
- (v) Signature, discovery and production bonuses typically relate to lump sum payments made to host governments upon discovery of hydrocarbons. BG has not identified any payments in this category in the year;
- (vi) Licence fees, rental fees, entry fees and other considerations for licences and/or concessions. These are fees paid in exchange for the right to carry out exploration for hydrocarbons generally over a specific time period and geographical area.
- (vii) Payments for infrastructure improvements include contributions made to governments, or expenditure directly incurred by BG, on infrastructure such as building roads or railways, port developments, electricity or water services, whether under contractual obligations or otherwise if there is a current or future benefit to the country as a whole. Payments in relation to social or community development, such as building hospitals or schools are deemed out of scope, as are any contributions to privately owned facilities.

Penalties, fines and interest payments have been excluded from the tables below.

Payments related to LNG liquefaction, shipping and marketing, BG's Global Energy Marketing and Shipping division and transportation pipelines do not constitute E&P activity and hence related payments have been excluded from this report.

Consolidated Payments Report
