**PROJECT OVERVIEW**

The Dones project is developing the Blakes Field, located in the South-Eastern North Sea, offshore Norway. The project is operated by Statoil, with partners Aker BP and ConocoPhillips. The field is expected to produce 340 million barrels of oil and 670 billion cubic feet of gas over its lifetime.

**Dones Project Details**

- **Location:** North of the UK, South of Norway
- **Production:** 340 million barrels of oil and 670 billion cubic feet of gas
- **Partners:** Aker BP, ConocoPhillips

**Technology**

The Dones project utilizes advanced technology, including subsea production systems and 3D printing.

**Environment and Society**

The project is committed to minimizing its environmental impact through innovative solutions.
